NFIP Support for Contingency Operations [REDACTED]

- A revised interim report that accommodates the views expressed at the 28 July CIPC meeting has been prepared. In revising the interim report, Paul and John Woodward visited LTC Keller, USMC, in OSD/ASD/C<sup>3</sup>, at Bobby [REDACTED] request. LTC Keller has had substantial experience in contingency operations and is heavily involved in coordinating a DIA/NSA agreement on providing direct support to the operating forces. He works on the tactical side of the C<sup>3</sup>I in the Pentagon. In the meantime, work continues on the final report.

CSEM [REDACTED]

- [REDACTED] worked this weekend, but apparently did not make much headway toward finishing the computer runs we need to complete preparation for the Collection Strategy Evaluation Method (CSEM) prototype demonstration. He is still encountering a technical problem with "data conversion" from one operating system to another. He has CIA/OIT office of customer services working on the problem.
